Tells of Trust Dangers. "Possibly it is not necessary to speak long on the trust question, for people learn more by appearance than they do by speeches and a speech can only point out the lessons of experience. It used to be that if a mill closed down under a democratic administration every republican paper and editor pointed to the mill and to its smokeless chimneys as an evidence that democratic policies were destroying the industries of the country. But now when a trust buys a plant and closes it down no republican says a word about it. "Bowling Green, in this state, has four

trusts. I went to West Superior, Wis., the other day and I found that they had six there. The flour mill trust had closed down six flour mills. You will find that the trust will close more mills than any policy that any other party ever stood for. The government of the United States believes that the happy influence upon the determinations of the Chinese emperor and of his government which the government of the French republic anticipates as the result of this step would be still further induced if the powers were to include, as part of their initial declaration and for themselves the benefits of open and equal commercial intercourse between the Chinese empire and the world at large.

"I have been taking your remedies, and the they have helped me a great deal. I had been in bed for ten weeks when began taking your Vegetable Compound, but after using it for a short time was able to be up around the house. The aching in the lower part of wor has left me. The most that troubles me now is the flowing. That is not bad, but still there is a little every day. I am not discouraged yet, and all continue with your medicine, for I believe it will cure me."—Mrs. Charles Johnson, Monclova, Ohio.
